

HOWTO Setup Windows 7-XP Outlook 2003/2007 with Exchange

Restart your computer. (This is necessary to ensure Outlook is not running in the background as this will introduce problems)

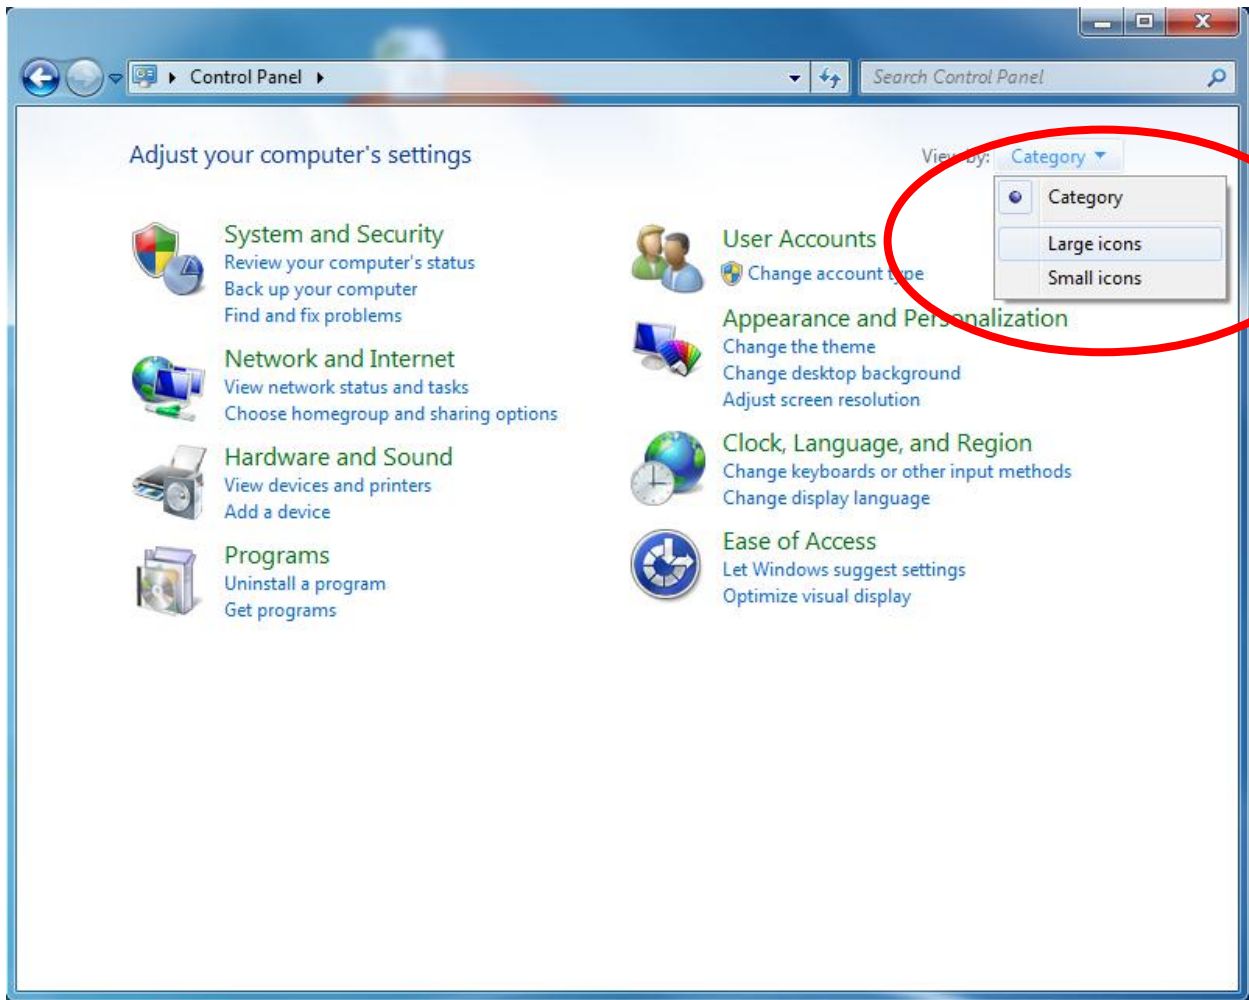

Log in to the network.

DO NOT START OUTLOOK.

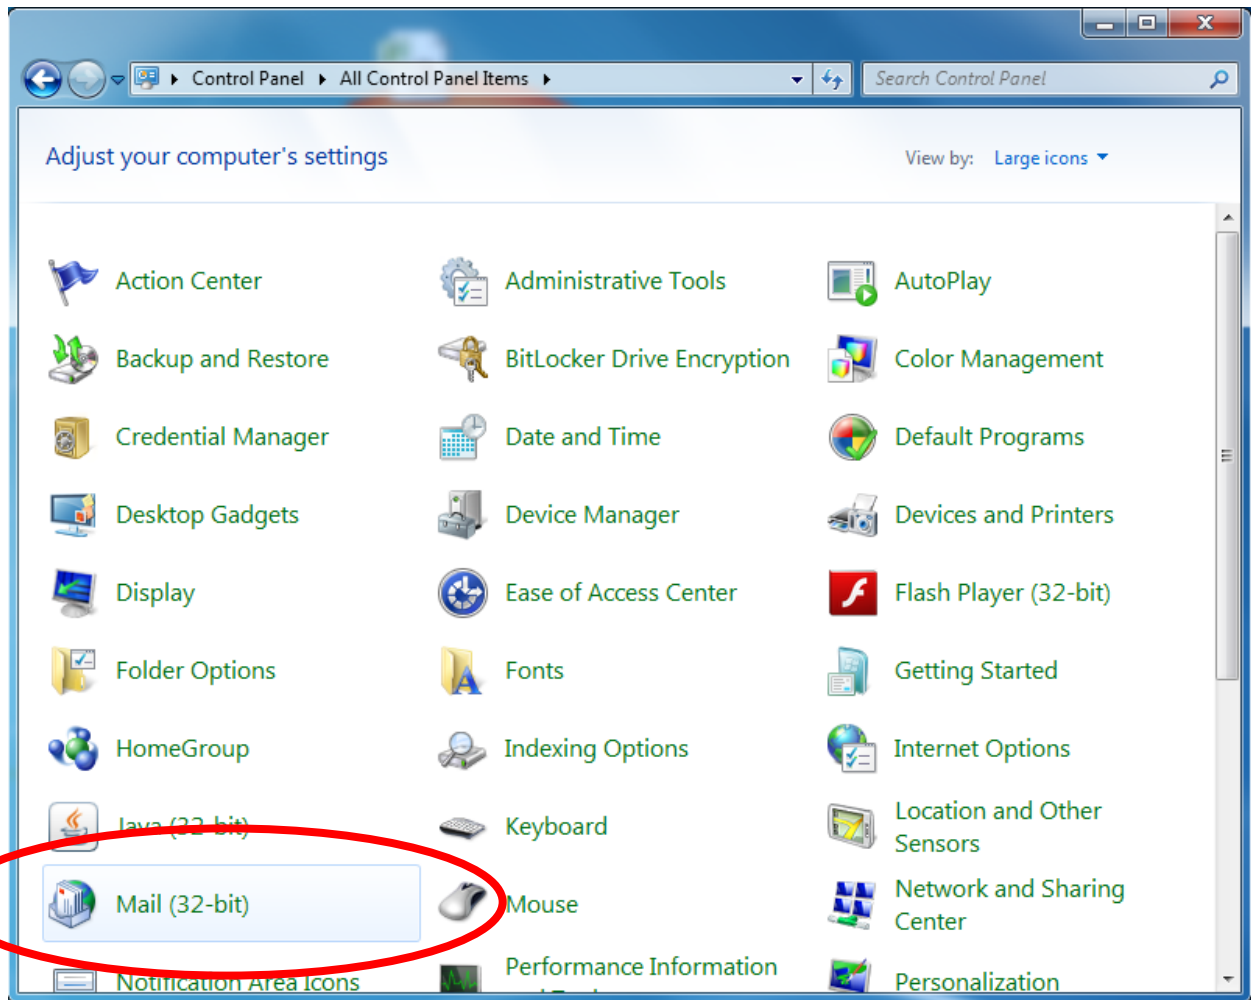

Press the start button, click on control panel

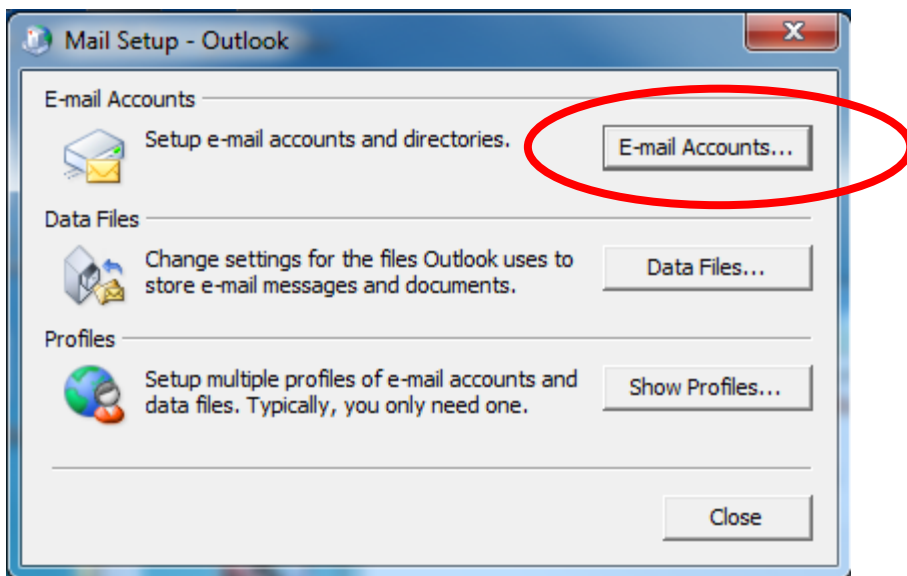

Click on Category and select LARGE ICONS

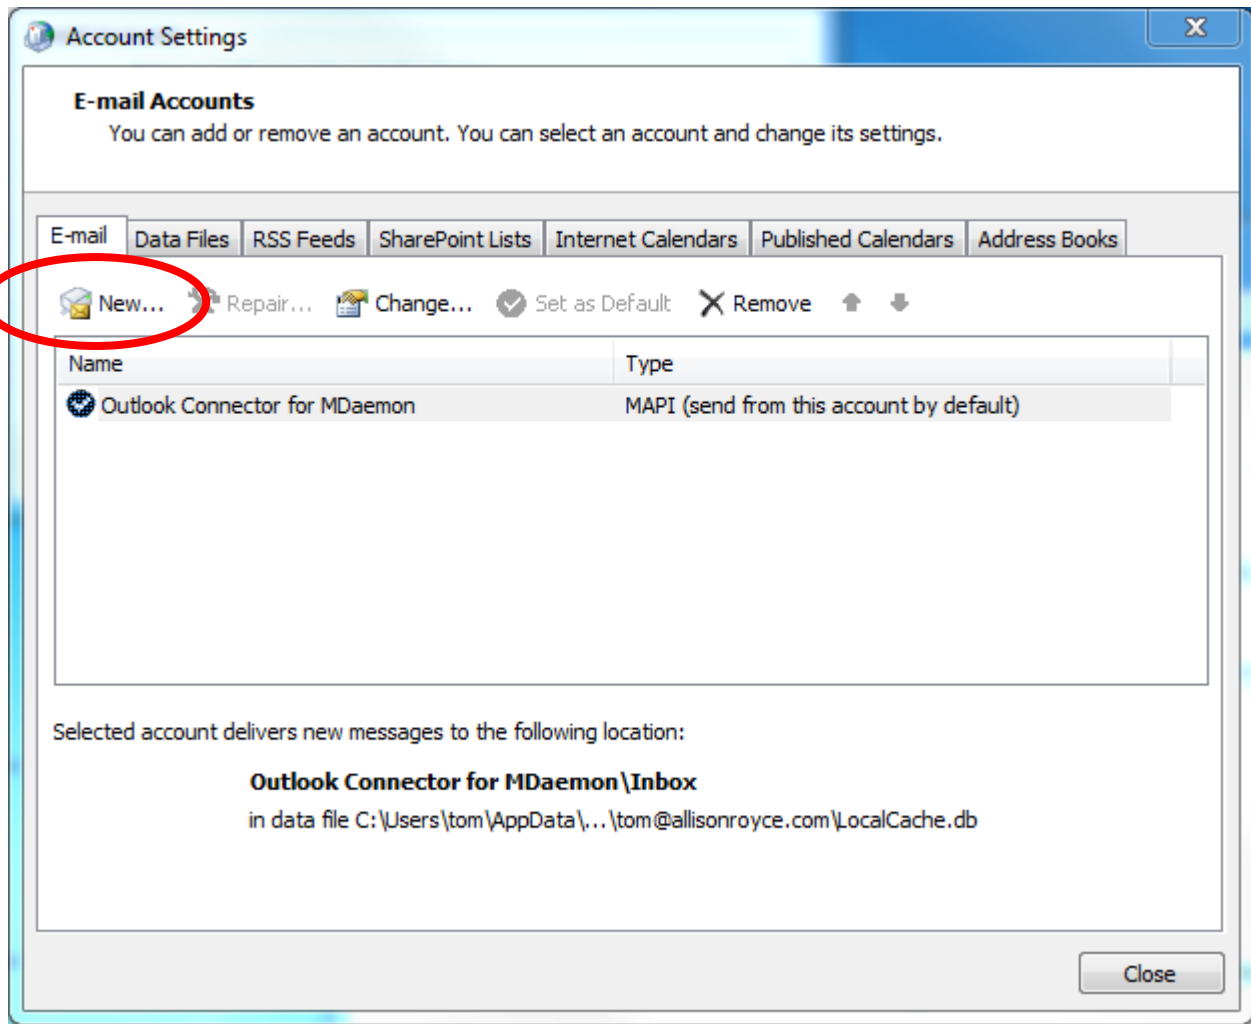

Select MAIL

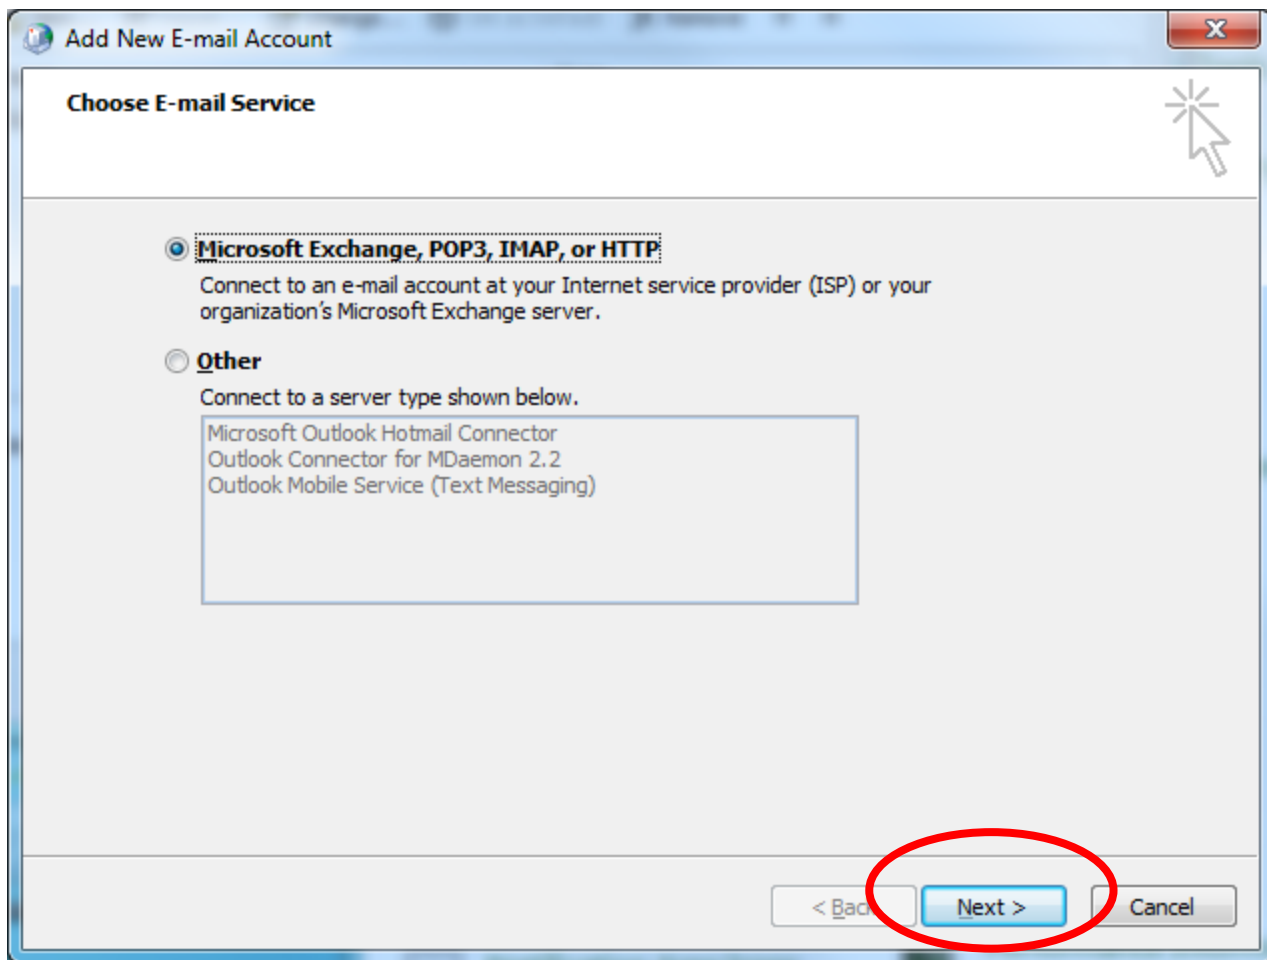

Click on Email Accounts

Click on NEW

Click Next

Click on manually configure server settings or additional server types, then click next

Add New E-mail Account

Auto Account Setup

Your Name:
Example: Barbara Sankovic

E-mail Address:
Example: barbara@contoso.com

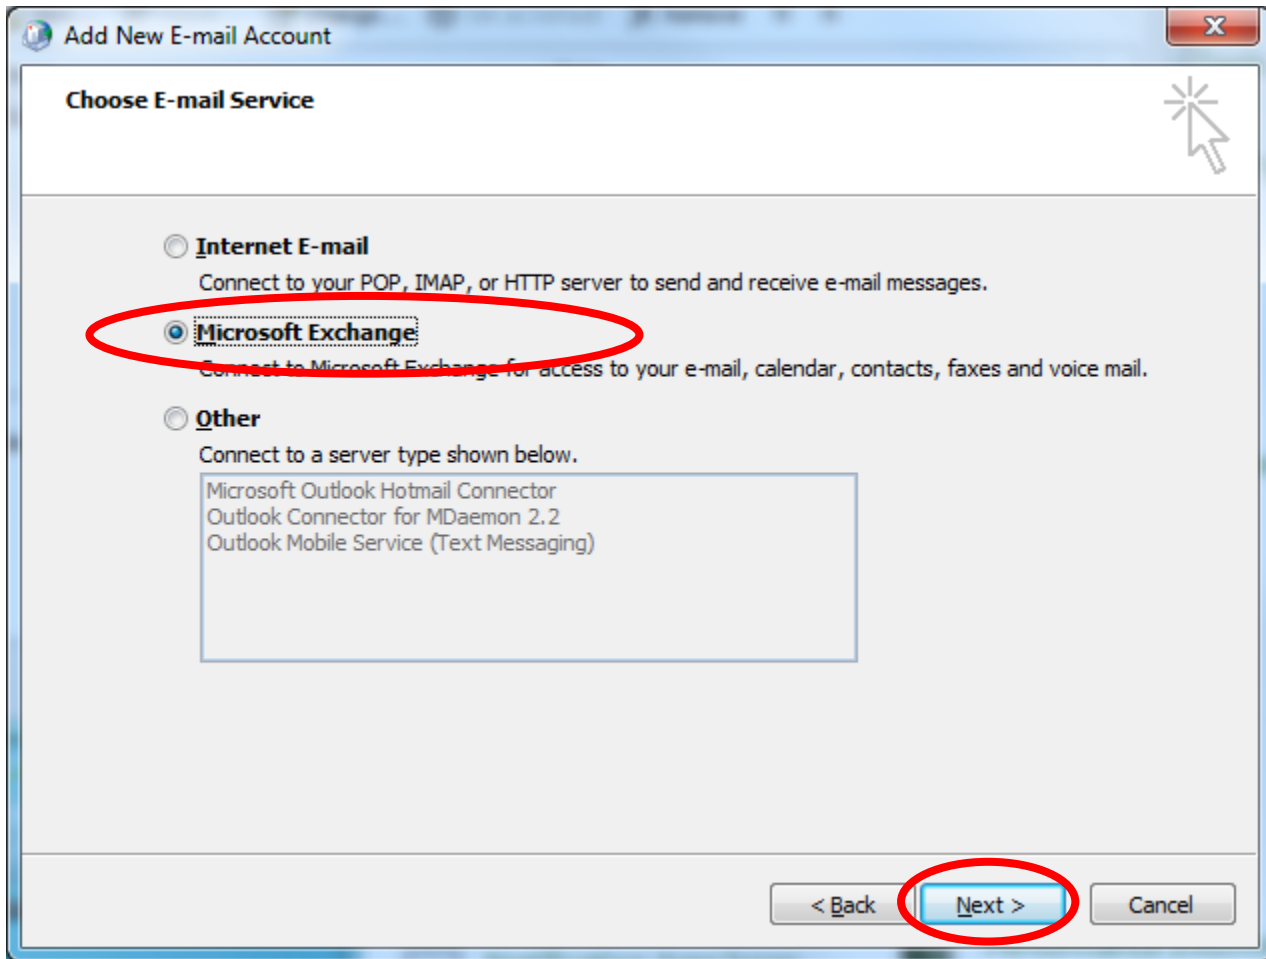

Password:

Retype Password:
Type the password your Internet service provider has given you.

Manually configure server settings or additional server types

< Back **Next >** Cancel

Click on Microsoft Exchange or compatible service. Then click next. If you receive an error, make certain that Outlook is completely closed, then try again.

Enter the following information as shown below:

Server: *hex01.globalmail360.com* (The 01 and 360 is using the number zero "0" NOT the letter "O")

Make sure the "Use Cached Exchange Mode" is checked

User Name: *yourname@yourdomain.com*

Then click on *More Settings*

Add New Account

Server Settings
Enter the information required to connect to Microsoft Exchange or a compatible service.

Type the server name for your account. If you don't know the server name, ask your account provider.

Server:

Use Cached Exchange Mode

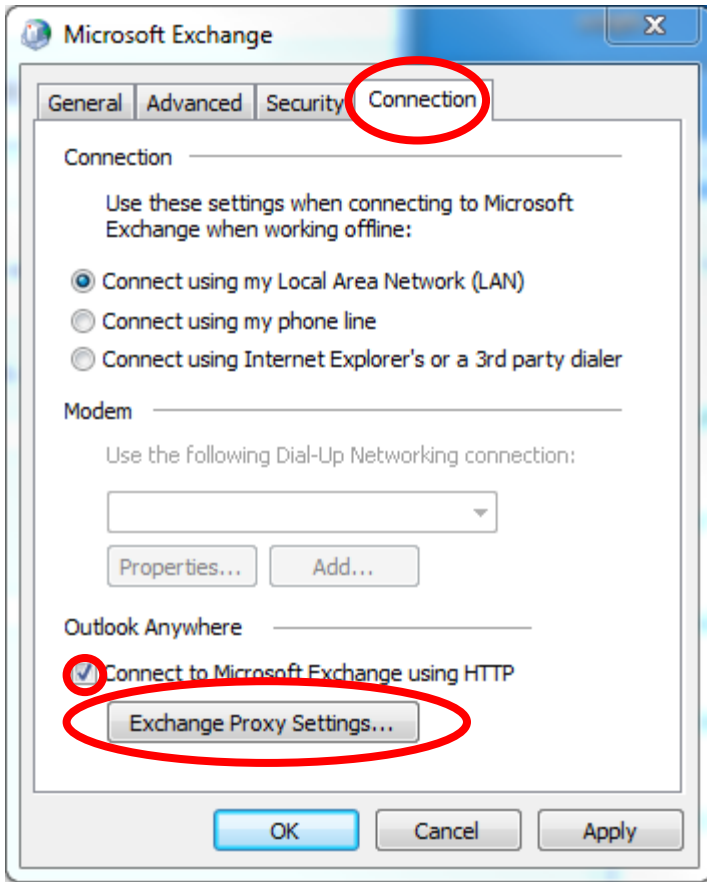

Type the user name for your account.

User Name:

Click on the Connection tab

Check the box that says *Connect to Microsoft Exchange Using HTTP*

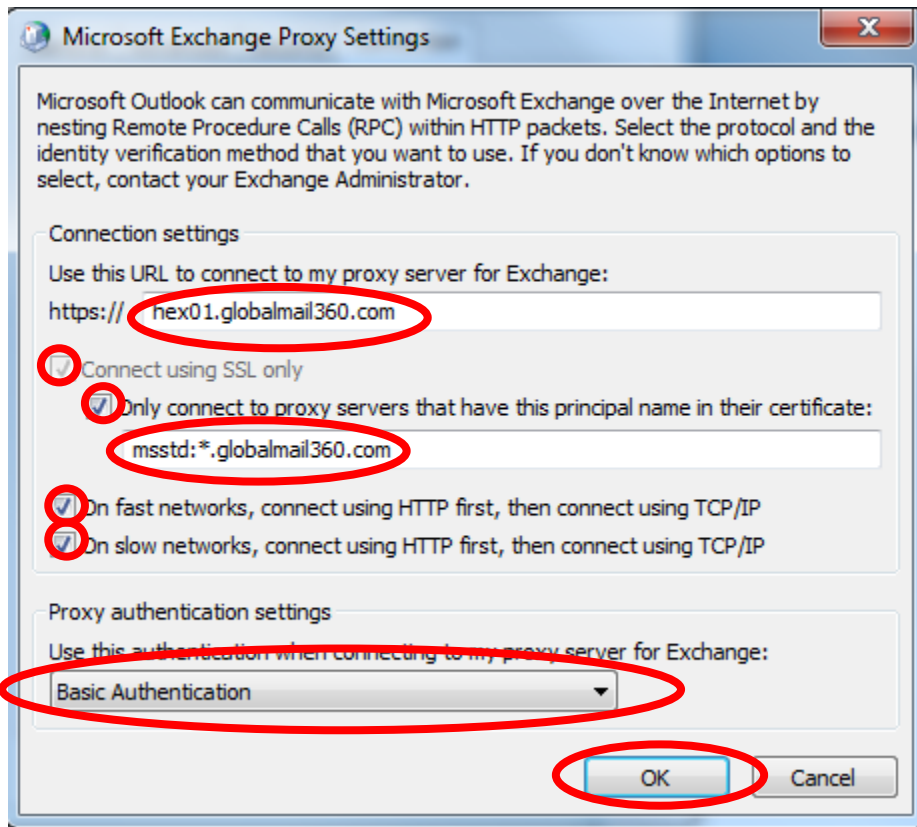

Click on *Exchange Proxy Settings*

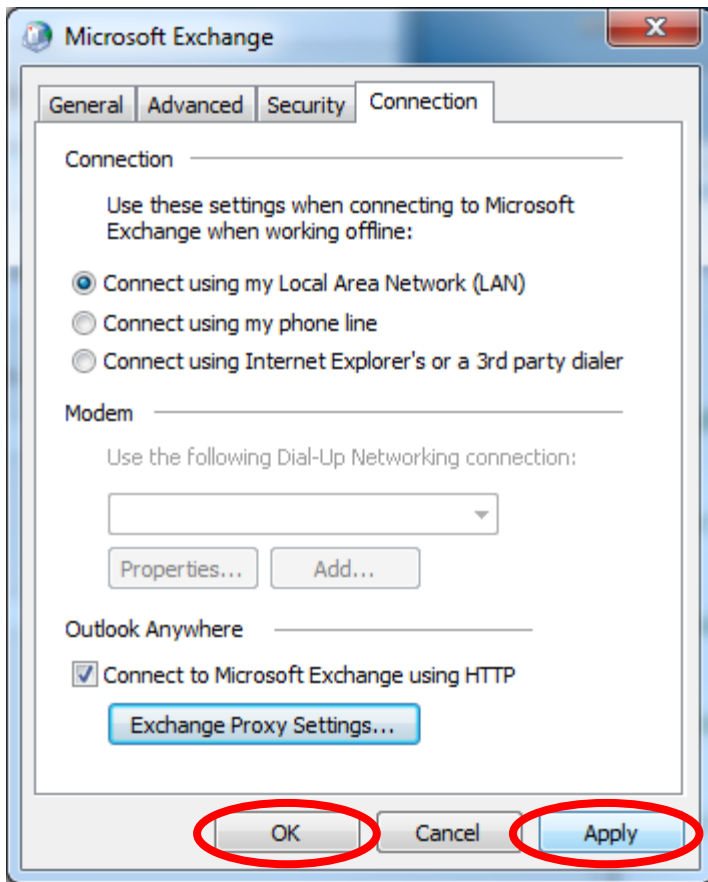

Fill in the following information exactly as the image below, all boxes checked

Select BASIC AUTHENTICATION from the dropdown list

Then click OK

Click APPLY, then OK

Click on *Check Name*.

You will be prompted for your EMAIL password.

Make certain that “*remember my password*” is checked.

THE NEXT STEP WILL TAKE SEVERAL MINUTES TO COMPLETE, ALLOW TIME FOR YOUR OUTLOOK TO COMPLETE THIS PROCESS. IF YOU ENCOUNTER ANY DELAY LASTING LONGER THAN 15 MINUTES DO NOT RESTART YOUR COMPUTER CONTACT YOUR DESIGNATED SUPPORT REPRESENTATIVE.

The screenshot shows the 'Add New Account' dialog box with the following details:

- Title Bar:** Add New Account
- Section:** Server Settings
- Instruction:** Enter the information required to connect to Microsoft Exchange or a compatible service.
- Server Name:** hex01.globalmail360.com
- Use Cached Exchange Mode:**
- User Name:** admin@guidobros.com
- Action:** Check Name (highlighted with a red oval)
- Buttons:** < Back, Next >, Cancel, More Settings ...

Upon successful connection to the Exchange server your *Server* and *User Name* will be underlined as shown below.

Once the underlined names appear, click *NEXT*

Add New Account

Server Settings
Enter the information required to connect to Microsoft Exchange or a compatible service.

Type the server name for your account. If you don't know the server name, ask your account provider.

Server: HEX01.globalmail360.com

Use Cached Exchange Mode

Type the user name for your account.

User Name: admin@quidobros.com

On the remaining setup dialog windows, click NEXT, then OK, then FINISH.

On the Account settings window, Click CLOSE, then close the mail setup window.

Open Outlook

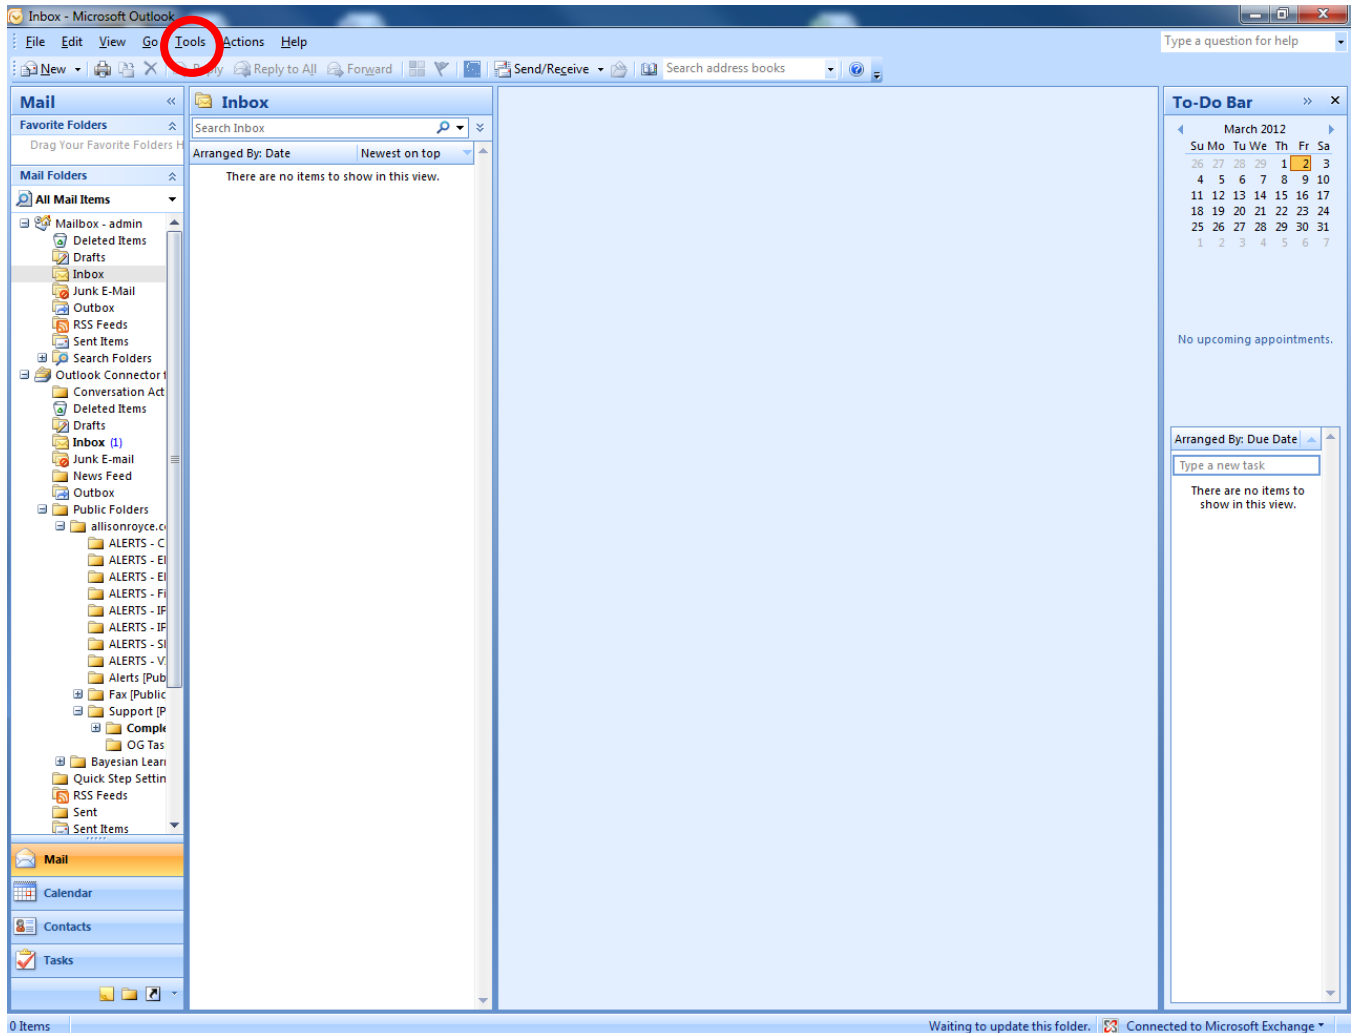

You will now have multiple inbox groups.

The group at the top of your left sidebar is your Exchange connection.

Allow your folders to populate, *THIS CAN TAKE ANYWHERE FROM A FEW SECONDS TO SEVERAL HOURS DEPENDING ON THE VOLUME OF EMAIL IN YOUR ACCOUNT.*

In Outlook click on **Tools** at the top of your screen

Click on **Account Settings**

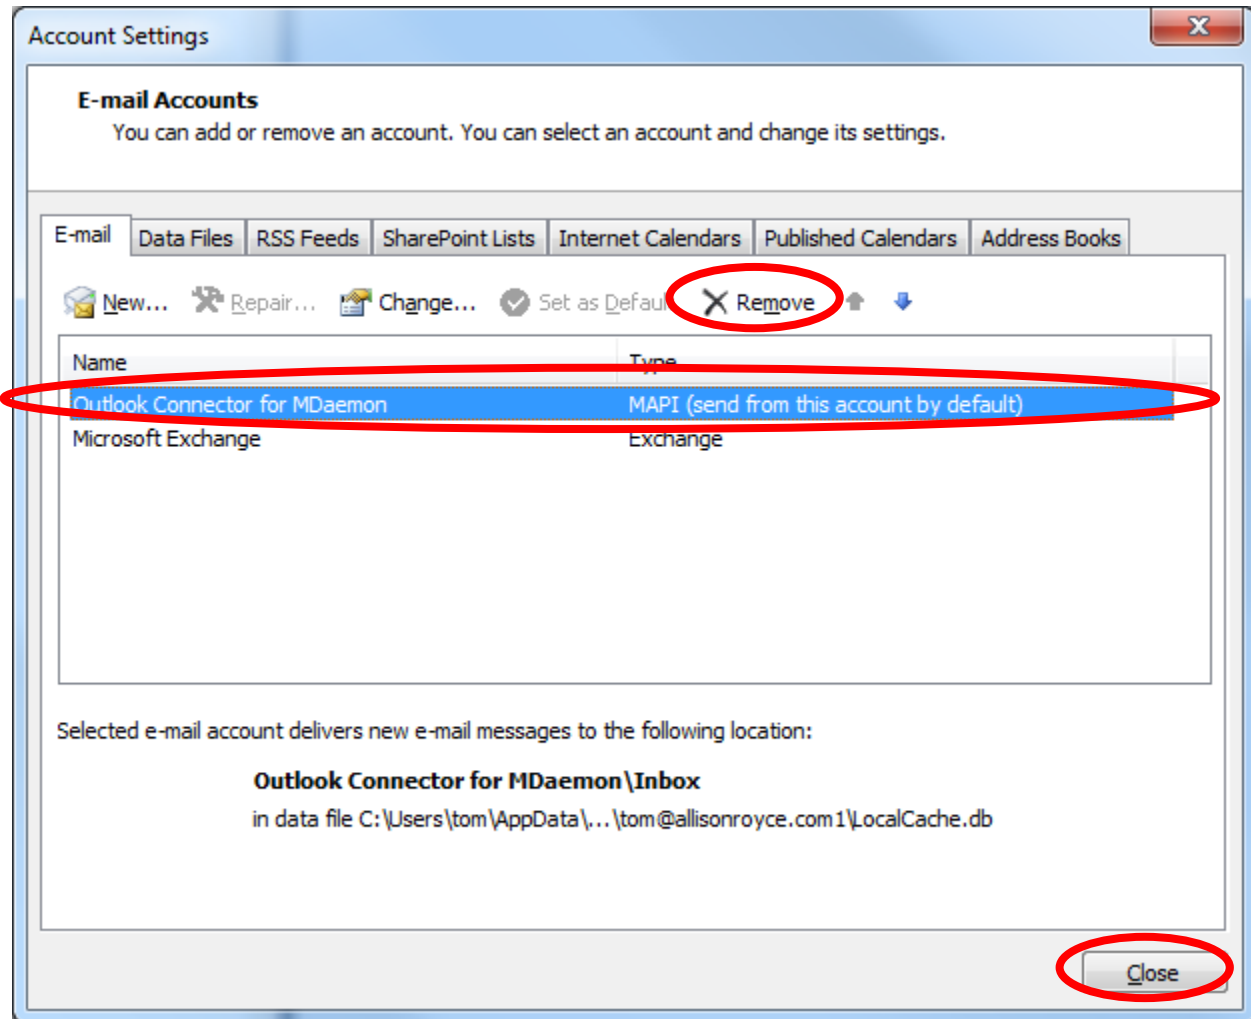

Click on Outlook Connector for MDAemon and click Remove

Click YES at the prompt. This may take a few minutes to de-populate.

Click Close

You are done.
