

**Go Wireless With A
Name You Can
Trust . . .**

Allison Royce
BUSINESS TECHNOLOGIES

A Wireless Local Area Network (WLAN) can be the perfect solution for cabling costs, structural and access limitations, and customer convenience and mobility needs. Wireless networks have become exceptionally popular with commercial outlets wanting to offer wireless access, or a "hotspot," to their clients and customers (e.g., hotels, motels, coffeehouses, libraries, and law firms).

Serving South Texas since 1993, Allison Royce has recently completed a South Texas Holiday Inn near San Antonio and is currently positioned to engineer, install and maintain your point-to-point and point-to-multipoint wireless networks, offering wireless solutions that fit a wide range of applications and budgetary requirements.

Contact an Allison Royce representative today at 210-564-7000 and let your business, employees, clients and customers begin experiencing the *true bliss of Wi-Fi Internet freedom!*
